

# PROJECT CASE STUDY

## Federal Law Enforcement Training Center

### ENVOCORE SOLUTIONS

- Installation of vitreous china HE plumbing fixtures and piston valves, lowflow shower heads, and ultra low-flow faucet restrictors
- Kitchen equipment and laundry equipment upgrades, as well as installation of sub-meters for the purposes of sewer exemption credits
- A number of different fixture types and implementation techniques were utilized during the construction phase to provide a seamless standardization of equipment

### MORE INFO

- During the design, Water Savers conducted extensive pre measurement and verification (M&V) of plumbing fixtures.
- Upon completion we conducted post-retrofit M&V of all installed equipment to verify performance specifications and aid in commissioning all newly installed equipment.

### PROJECT BACKGROUND

The project included the headquarters facility, located in Glynco, GA (near Brunswick) and one of the residential training centers located in Charleston, SC. Water Savers conducted the investment grade audit (IGA) under a design contract and was selected as a subcontracting. Construction has reached substantial completion and is currently in the close-out period.

### ABOUT THE FLETC

The Federal Law Enforcement Training Centers (FLETC), a division of the Department of Homeland Security, site serve as interagency training grounds for over 91 federal agencies, in addition to state and local law enforcement personnel. Since its inception in 1970, over one million law enforcement officers have trained at FLETC.
