

## PROJECT CASE STUDY

# Sullivan County Memorial Hospital

SULLIVAN  
COUNTY  
MEMORIAL  
HOSPITAL

### ENVOCORE SOLUTIONS

- ECM's (Energy Conservation Measures):  
Plumbing Fixture Retrofits
- The installation of the new fixtures included Flushometer Toilets with flow moderators to ensure that the gallons per flush are at a conserving level of flow (1.5 gpf).
- Lavatory sinks, utility sinks and pre-rinse sinks were also installed as well as retrofitted and replacing spray valves in sinks.
- Their utility savings were generated in three different areas: water, sewer, and natural gas usage.

### DRIVERS

- By being more energy efficient the hospital could tap into dollars normally spent on operations.

### PROJECT BACKGROUND

With increasing operating costs continuing to plague the viability of the hospital, there was a need to identify other means of strengthening the hospital's financials.

RTS Water, a division of Envocore, conducted an evaluation of the facility and from that developed a plan to help them save on energy costs.

### SULLIVAN COUNTY MEMORIAL HOSPITAL

Located in Milan Missouri, Sullivan County Memorial Hospital is a nonprofit organization serving the health care needs of Sullivan County and the surrounding area with primary areas of acute, emergency, outpatient and long-term care since 1953.
