

# PROJECT CASE STUDY

## City of Houston ESPC Water Conservation Scope

### ENVOCORE SOLUTIONS

- The replacement of 44 controllers managing over 700 stations/zones and the replacement of over 5,000 sprinkler heads
- The installation of a weather station, solar powered controllers and multiple system remote controllers and web access based on user classification
- Completed work on the restrooms and included a rain water harvesting design to be constructed in the future

### MORE INFO

- Upon completion of project implementation, Water Savers' representatives will conduct post-retrofit measurement and verification of all installed equipment to verify performance specifications and aid in commissioning all newly installed equipment.

### PROJECT BACKGROUND

Water Savers, LLC, a division of Envocore, worked with an ESCO on this project which included the optimization of water used for landscape irrigation and plumbing spread across the City of Houston Parks & Recreation department.
